2024 CEC Generation of Environmental Leaders Program

Participation Guidelines

Please read these guidelines carefully. By participating in the Commission for Environmental Cooperation (CEC) Generation of Environmental Leaders Program, you attest that you understand the Program guidelines and agree to abide by its rules and requirements.

The Generation of Environmental Leaders Program (GELP) invites youth¹ in Canada, Mexico, and the United States, to submit their solutions² *“to act now to support North American communities and preserve our shared waters, lands, and air.”*³

The selected North American youth will experience a year-long mentorship, receive C\$15K in seed funding, and contribute to a dynamic community of knowledge sharing and collaboration, as well as the chance to present their solutions to North America’s top environmental officials and receive unique networking and mentorship opportunities.

About the CEC

The Commission for Environmental Cooperation (CEC) was established in 1994 by the governments of Canada, the United Mexican States (Mexico), and the United States of America (United States) through the North American Agreement on Environmental Cooperation, a side agreement concluded in connection with the North American Free Trade Agreement (NAFTA). As of 2020, the CEC operates in accordance with the Agreement for Environmental Cooperation, which entered into force at the same time as the new trade agreement, known as CUSMA, T-MEC and USMCA in each of these three countries, respectively. The CEC brings

¹ Youth part of a team such as, but not exclusively, youth-led organizations, youth-led associations, nongovernmental organizations, and not-for-profit youth-led organizations, teams of youth innovators, or entrepreneurs interested in building their businesses.

² The CEC defines solution as a practical, effective, and sustainable resolution to an identified environmental problem or issue. It involves the ideation and the development of an innovative solution designed to mitigate or address the root causes of environmental challenges. Solutions should be context-specific, considering the unique characteristics of the community or region targeted by the solution.

³ See [CEC’s Strategic Pillars](#).

together a wide range of key actors, including the general public, Indigenous peoples & local communities, youth, nongovernmental organizations, academia, and the business sector, to seek solutions to protect North America's shared environment while supporting sustainable development for the benefit of present and future generations.

The CEC is governed and funded equally by the Government of Canada through Environment and Climate Change Canada, the Government of Mexico through the *Secretaría de Medio Ambiente y Recursos Naturales*, and the Government of the United States through the Environmental Protection Agency. Find out more at: www.cec.org.

CEC Generation of Environmental Leaders Program steps

Solution Submission: Participants must submit their solution by filling out the appropriate online form by 31 March 2024, 23:59 local time.

Submission Evaluation: All submissions are evaluated by an external evaluation panel with five weighted criteria (see below). The 15 submissions (five per country) that best meet the Program requirements will be approved and sent to government officials from Environment and Climate Change Canada (ECCC), Mexico's Ministry of Environment and Natural Resources (Semarnat), and the United States Environmental Protection Agency (EPA).

Selected Youth Leaders Announced: Government officials from the three North American countries will select one solution per country, based on established criteria (see below).

Solution Presentation: The youth leader representing each of the three selected solutions and an additional team member will be invited to the annual 2024 CEC Council Session to be held in summer 2024, to present their solution to the environment ministers of Canada, Mexico and the United States.

Program scope: The youth leader representing each of the three selected solutions and an additional team member will participate in a year-long mentorship, receiving advice from experts to help advance their solution. In addition, a total amount of C\$15,000 per country will be allocated for each of the three selected solutions.

Rules and Requirements

Eligibility

- Participants in the CEC Generation of Environmental Leaders Program must be between 18 and 35 years old on the date they upload their solution to the Foundant platform.
- The solution must be uploaded by an individual who will act as the representative for the team of submitters. The individual submitting the solution should fulfill all eligibility requirements. The solution must specify two team members. All team members must be between 18 and 35 years old.
- Participants must be part of a team such as, but not exclusively, youth-led organizations, youth-led associations, nongovernmental organizations, and not-for-profit youth-led organizations, teams of youth innovators, or entrepreneurs interested in building their businesses.
- Participants must be residents of Canada, Mexico or the United States.
- Participants must demonstrate that their solution can suitably address or respond to critical issues related to supporting North American communities and preserving our shared waters, lands, and air.
- The Commission for Environmental Cooperation (CEC) staff, Youth Innovation Challenge winners, Traditional Ecological Knowledge Expert Group (TEKEG), and Joint Public Advisory Committee (JPAC) members, including their immediate family members, and Generation of Environmental Leaders Program judges or their immediate family members (siblings, children, grandchildren) are not eligible to apply.
- The youth leader representing the team, plus an additional team member, per country, will present their solution at the 2024 CEC Council Session to be held in summer 2024; therefore, participants must have a valid passport at the time of their submission and be prepared to apply for any of the required travel documents if they are selected.

How to Participate

Participants must submit their solution in Foundant.

All submissions must include the following information for the team representative and for an additional team member:

- Full name (as it appears in their passport)
- Email address
- Current city and country of residence
- Date of birth

All submissions must be completed by filling out every section of the online form.

The external evaluation panel will select the 15 solutions that best meet the evaluation criteria, for consideration by the panel of judges. In addition, selected youth leaders must fulfill all Program requirements (see below).

Deadlines

- **Submission Deadline:** All fully completed submissions must be posted to the Foundant platform by 23:59 local time on 31 March 2024. Submissions that are incomplete or posted after this time will be considered ineligible.
- **Finalists Selection:** The external evaluation panel of experts will select 15 solutions (five per country) that qualify for the final selection of youth leaders.
- **Youth Leaders Selection:** It is expected that the panel of judges will select 1 solution per country in May 2024.

Selected solutions

- One solution per country will be selected by a panel of judges selected from the federal governments of Canada, Mexico, and the United States.
- The top solutions will be selected based on the criteria described below.
- The top solutions will be selected in May 2024. The team representative for each top solution will be notified by email.

Mentorship Program

- Selected youth leaders and an additional team member will be eligible and committed to attending the mentorship sessions enabling them to further develop their solution and receive direct guidance from an expert on differing elements of their solution, including how to pitch their solution to top environmental officials at the 2024 CEC Council Session (see below) and other audiences.
- A representative youth leader for each team, plus an additional team member, must attend all mentorship sessions organized by the CEC (approximately ten sessions throughout the year). The date and time of these sessions will be established based on the availability of the youth leaders.
- At the end of the mentorship program, youth leaders will need to develop a tool (document, infographic, video, etc.) applying the knowledge acquired through the mentorship program that will be posted on the CEC website. The tool will be added to a repository accessible to other youth and future applicants to the Generation of Environmental Leaders Program.

Outreach activities

- The team representative and an additional team member of the three selected solutions (1 per country) will be invited to present their solution to North America's top environmental officials at the **2024 CEC Council Session** to be held in summer 2024.

For the attendance at the 2024 CEC Council Session, transportation and lodging, airport transfer expenses, and a daily stipend for food will be provided. The traveler is responsible for obtaining

the necessary preliminary travel documents, such as a valid passport and travel visa (if applicable) and must cover the costs thereof.

- The invitation to attend the 2024 CEC Council Session will be extended to the team representative for each of the three selected solutions (one per country) and an additional team member. However, only the team representative will present the solution. Some online activities will be open to all team members.
- The team representative and an additional team member for each top-selected solution must acknowledge their agreement to participate in the **2024 CEC Council Session** not later than one week following notification of the selection of their solution in order to remain eligible to receive transportation and lodging, airport transfer expenses, and a daily stipend for food.

Seed funding

- The team representative (on behalf of their team) for the top solution will receive C\$15,000 in seed funding per country. This funding may be used to develop solution tools, cover the cost of design and layout for promotional materials, prototype, travel to pitch meetings, travel to communities where the solution will be implemented, expenses related to the development of workshops, or other expenses approved in advance by the CEC. The CEC will provide a mentorship session on budget development. This money may not be used to purchase equipment.
- A member of the team to act as signing authority will need to be identified for each of the three selected solutions, and a contract must be signed in order for the seed funding to be disbursed.
- The seed funding will be disbursed in two payments. Part of the seed funding should be used to cover additional trainings to help strengthen the solution. Reports will be sent to a representative at the CEC Secretariat.

Reporting and communication

- The selected three solutions will receive broad recognition and exposure through wide multi-platform distribution, including on the CEC website and other social media sites.
- Selected youth leaders will need to share with the CEC any information on participation in events promoting their solution.
- Selected youth leaders will share raw material, such as pictures and videos, with the CEC in order to promote their participation through wide multi-platform distribution.
- Selected youth leaders will have to create two reports: a midterm report 90 calendar days after the first disbursement of the seed funding, and a concluding report 180 calendar days after the first disbursement. Reports will be sent to a representative at the CEC Secretariat.
- Selected youth leaders must add a media report to their concluding report, which includes all promotional materials they created.

Judging

- Solutions must address the theme⁴ and have a direct impact on North American communities and their environment.
- Solutions must demonstrate that they actively contribute to support North American communities and preserve our shared waters, lands, and air.
- Solutions must demonstrate a strong impact on communities with a strong case that facilitates long-term sustainability.
- Solutions will be judged according to the following criteria: impact and community engagement (40%), feasibility (25%), alignment with the CEC's Strategic Pillars and the Program theme (15%), identification of problem/issue (10%), and innovation (10%).
- Solutions must have been developed by youth aged 18 to 35 in Canada, Mexico or the United States.
- Any submissions containing vulgarity, nudity, discrimination, violence, defamatory language, or any other subject matter deemed by the CEC to be inappropriate, will be disqualified and given no further consideration.

Participants agree that the decisions of the panel of judges are final.

Evaluation Criteria

The CEC defines solution as a practical, effective, and sustainable resolution to an identified environmental problem or issue. It involves the conceptualization and development of an innovative solution designed to mitigate or address the root causes of environmental challenges. Solutions should be context-specific, considering the unique characteristics of the community or region targeted by the solution. For solutions that are already being implemented, proof of the generated impact and feasibility should be provided with documents such as reports with data, and for solutions not yet implemented, potential impact and feasibility should be clearly outlined through concrete examples of activities and/or possible outcomes.

Submitted solutions will be judged according to the following criteria:

- **Impact and community engagement (40%)**

The CEC defines impact and community engagement as tangible, positive effects that the solution has on the environment and community. The impact can be measured in terms of the changes, improvements, or outcomes resulting from the solution's activities. It encompasses both short-term and long-term effects that contribute to the overall goal of addressing environmental challenges and fostering sustainability. For the community to be engaged, the solution should actively involve and empower community members in the planning, implementation, and decision-making processes

⁴ Act now to support North American communities and preserve our shared waters, lands, and air

of the solution to foster collaboration, build local support, and ensure that the solution aligns with the needs and priorities of the community, which will facilitate the local appropriation.

- How does your solution benefit, address, and/or respond to critical environmental issues in North America? How does your solution demonstrate direct impacts that support communities addressing these challenges?
- *Sub-question 1:* How are community members engaged in your solution? And how will they be engaged/impacted in the future?
- *Sub-question 2:* Does your solution integrate diverse members of your community who traditionally lack access to decision-making spaces or the necessary resources or capacities that would address the issue your solution is tackling?
- *Sub-question 3:* Approximately how many community members are being impacted or could potentially be impacted by your solution? How would you measure the impact of your solution in the community or communities?

- **Feasibility (25%)**

The CEC defines feasibility as the practicality and viability of implementing a particular solution. It involves a comprehensive assessment of various factors, including financial, technical, logistical, and organizational considerations, to determine whether the proposed solution is realistic and achievable. A feasibility analysis helps evaluate the potential challenges, risks, and opportunities associated with the solution, providing insights into its likelihood of success.

- How will you implement your solution, considering feasibility and the availability of resources?
- How will you manage the financial resources along with the administrative matters?
- What is the timeline envisioned to achieve the objectives? Are there any short-term objectives?

- **Alignment with the CEC's Strategic Pillars⁵ and the Program theme⁶ (15%)**

The CEC defines alignment with the [CEC's Strategic Pillars](#) and Program theme as the degree to which the solution's goals, activities, and outcomes are consistent and harmonized with the overarching theme of the Program. It involves ensuring that every

⁵ See [CEC's Strategic Pillars](#)

⁶ *Act now to support North American communities and preserve our shared waters, lands, and air.*

aspect of the solution is in sync with the core principles, objectives, and values related to CEC’s Strategic Pillars.

CEC’s Strategic Pillars	
1 Clear Air, Land and Water , particularly addressing matters of mutual interest with respect to air quality and protection of the ozone layer.	4 Shared Ecosystems and Species , particularly the conservation and sustainable use of biological diversity and protection of ecosystems.
2 Preventing and Reducing Pollution in the Marine Environment , particularly taking action to prevent and reduce marine litter, including plastic litter and microplastics, and addressing ship pollution.	5 Resilient Economies and Communities , including promoting environmental goods and services, improving environmental, economic and social performance, contributing to green growth and jobs, and encouraging sustainable development.
3 Circular Economy and Sustainable Materials Management , particularly the use of flexible, voluntary mechanisms to protect the environment and natural resources, such as conservation and the sustainable use of those resources.	6 Effective Enforcement of Environmental Laws , including promoting public awareness of environmental laws and policies, and enforcement and compliance procedures.

- In what way does your solution align with the theme of the Program? How does it connect with part of the CEC’s Strategic Pillars?

- **Identification of problem/issue (10%)**

The CEC defines the identification of a problem or issue as the systematic process of recognizing, defining, and understanding specific challenges or concerns within the scope of your solution. It involves conducting thorough research and analysis to pinpoint the root causes and manifestations of environmental problems your solution aims to address. The clarity in identifying these issues serves as the foundational step to developing targeted and practical solutions.

- What is the issue your solution is addressing? What steps did you take to identify this issue and find a solution?
- Do you consider that your solution could have additional impacts for other environmental issues beyond its main objective?

- **Innovation (10%)**

The CEC defines innovation as the introduction of new ideas, methods, or products that can bring about positive change and improvement. Regarding environmental problem-solving, innovation involves creatively addressing challenges to develop sustainable solutions. It requires a different way of thinking, embracing novel approaches, and applying inventive thinking to make a meaningful environmental impact.

Here are some examples of innovation: new technical solutions, green infrastructures, circular economy initiatives, use of Traditional Ecological Knowledge (TEK) and/or nature-based solutions, community engagement activities, environmental education activities, behavioural and/or transformative change activities, policy advocacy solutions, and cross-disciplinary collaboration.

- How is your solution innovative? How does it differ from current solutions?
- In which way do you consider your solution will complement current activities at local level?

Program Requirements

Selected youth leaders must commit themselves to fulfilling the Program requirements:

- Attend **all** mentorship sessions.
- Present their solution in at least one regional or international conference.
- Provide a mentorship session for the 2025 cohort of youth leaders.
- Share networking opportunities with other members in the 2024 cohort of youth leaders.
- Provide at least one tool/document/training material to upload to the CEC webpage as a support resource for other youth leaders.
- Send a mid-term report and a concluding report to a representative of the CEC Secretariat.
- Prepare a short video describing their solution and share this video with a representative of the CEC Secretariat.

Additional Considerations

- Priority will be given to those solutions that have been developed with communities, including members of the community who traditionally lack access to decision-making spaces, training or capacity building and that demonstrate a direct impact (see definition above) on promoting equal access to a healthy environment, particularly from social perspectives.

Submission Use and Copyright

- The submitter(s) will retain the intellectual property rights to their solutions after submission. Nonetheless, the submission process grants the CEC unlimited rights to share the solutions through, but not limited to, social media, its website, or other communications and publications.
- The CEC reserves the right to discuss and promote all submitted solutions and the names of the team members who submit the top solutions in any CEC-related promotional or advertising venture, without notification or compensation to the participant.

- The submitters agree to the possibility of broad multi-platform distribution of their work, including via Internet, video, and print.
- The submitters will receive credit for their contributions.

Official Languages

- The official languages of the Generation of Environmental Leaders Program are English, French and Spanish. Participants may submit their solutions in any of the three languages.

Liability

- By entering the Generation of Environmental Leaders Program, each participant acknowledges and agrees that the CEC, its staff, and the panel of judges (i) shall have no liability of any kind whatsoever, with respect to this Program, including travel to the CEC Council Session and seed funding; (ii) makes no warranty, guarantee or representation of any kind concerning the activities and seed funding; (iii) disclaims any implied warranty; and (iv) is not liable for injury, loss or damage of any kind resulting from the participant's acceptance of these guidelines and legal requirements, or use of the seed funding or otherwise from such participation in this Program. The CEC, its staff, and the panel of judges are not responsible for typographical or other errors in the offer or administration of this Program, including, but not limited to, errors in advertising, the official Program rules, the selection and announcement of selected Youth Leaders, or the distribution of the seed funding. The CEC, its staff, and the panel of judges are not responsible for any problems or technical malfunctions of any telephone network or lines, computer online systems or servers, computer software problems or traffic congestion on the Internet or at any website, and assume no liability for damage to participant's or any person's computer resulting from participation in the Program. Participants agree to release and hold harmless the CEC, its staff, and the panel of judges from and against any claim or cause of action, including, but not limited to, personal injury, death, or damage to or loss of property arising from participation in the Program or receipt or use or misuse of any activity and seed funding.
- The CEC is an international organization in Canada operating under the Headquarters Agreement Between the Government of Canada and the Commission for Environmental Cooperation. Nothing in this selection process, including participation in the Generation of Environmental Leaders Program and during the CEC Council Session, shall be deemed to be a waiver, express or implied, of any immunity from suit, legal process or execution, or of any privilege, exemption or other immunity, enjoyed or which may be enjoyed by the Commission pursuant to any applicable convention, agreement, law or decree, whether international or domestic.

Negotiation

- Disputes resulting from the participation in the Generation of Environmental Leaders Program or in the interpretation, validity, or enforceability of rules pertaining to this Program shall be resolved by good-faith negotiation between the participant and the CEC.

Other

- Any solution submitted by a participant does not reflect the views of the CEC or the governments of Canada, Mexico, and the United States, nor do these Parties endorse any representations made in the solutions. Further, participants agree not to use the name or logos of the CEC or any of the three countries, unless the appropriate permission has been warranted.
- Participants must follow all instructions or risk their solutions not being accepted.
- The CEC is not responsible for the cost of developing the solutions.
- The CEC is not responsible for lost, late, or misrouted solutions.
- Participants must inform the CEC if their contact information changes at any time between submitting their solutions and the announcement of the Program's selected Youth Leaders.
- The CEC retains the right to cancel the Program for any reason whatsoever, and without advance notice to the participants.
- The CEC retains the right to change the rules of this Program or any or all of the elements of the Program seed funding.
