

A synthetic hair brand that eliminates
skin rashes and single-use waste

Braid Extensions & Synthetic Hair

Women average 15 different hairstyles a year

Problem

One in three
women
experience scalp
irritation from
synthetic hair

Hair stylists
struggle to find
affordable, high
quality hair online
and in stores

Synthetic hair is
made of plastic
and contributes
to pollution

Solution

End User Benefits:
Itch-free, recyclable synthetic hair

Stylists' Benefits:
Subscription service

Environmental Benefits:
Eliminate single-use waste

Rebundle Life-Cycle

After you've enjoyed
your style, take your
braids down

mail your hair to us
for recycling

we'll Rebundle the hair
into new products

1 We provide
plant-based fiber
synthetic hair.

2 it's then wholesaled
to salons and braidologists.

4 and sent to us to be
recycled and Rebundled.

the used hair is collected at
our designated points.
