

Clean, Green and Moving: Borders, Corridors and Gateways

Roberto Aguerrebere

JOINT PUBLIC ADVISORY COMMITTEE (JAPC) MEETINGS
XX SESSION OF THE COMMISSION FOR ENVIRONMENTAL
COOPERATION OF NORTHAMERICA
Los Cabos, BCS, July 10, 2013

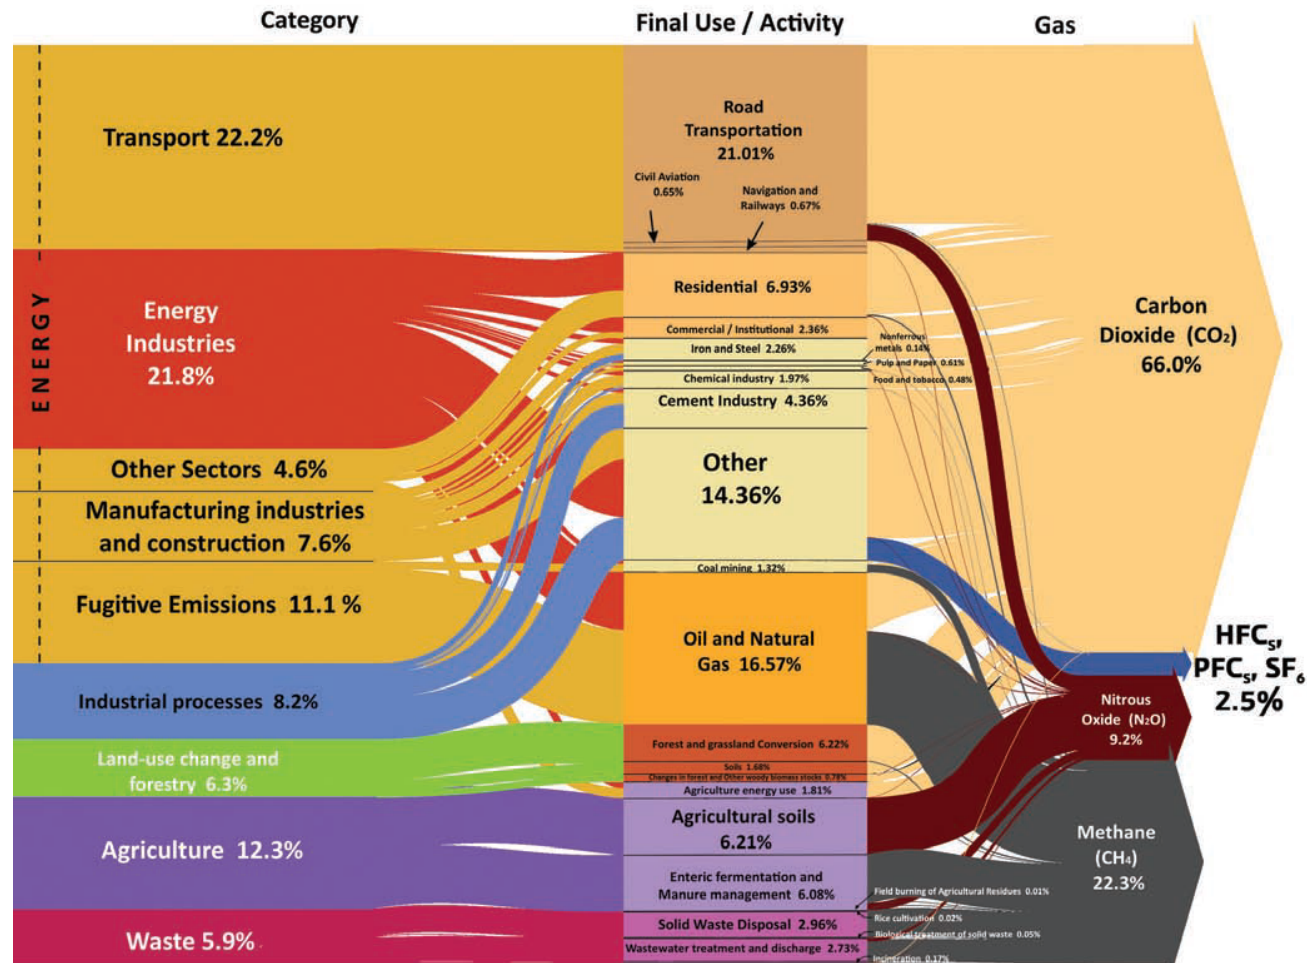

Contents

1. Estimated emissions of transport in México.
2. Modal split & modal characteristics
3. Modal emissions
4. Transport emissions mitigation in Mexico
5. Some transborder freight transportation issues
6. Changes in trade due to near sourcing supply:
risks & opportunities
7. Other considerations

National inventory of GEI

Based in methodologies of IPCC, 2006.

Freight modal split & modal characteristics

Autotransporte	74 %	}	89%	}	83%
Ferrocarril	15%		Land		17%
Marítimo	11%				
Aéreo	<0.4%				

Modal emissions

las barcasas fluviales llevan mucha ventaja a trenes y camiones.

Toneladas de CO₂ por millón de toneladas-kilómetro

Transport emissions mitigation in Mexico

- Energy efficiency standards
- Commercial vehicles Eco-driving
- New infrastructure (*turnpikes*)
- Vehicle renewal/substitution
- Intermodal transport & shortsea shipping
- Urban public transport & bicycling

Some transborder freight transportation issues

- Only Mexico-Tx Border: 13 bridges
 - 3.330 million northbound vehicle crossings in 2011 => congestion
- Challenges
- Reducing inspection points: - 5% emissions/queue
 - Reducing queue length: - emissions
 - Inspection point unification: - emissions
 - Scheduling system: - emissions
 - Preauthorization of vehicles, operators & cargo: - emissions

Changes in trade due to near sourcing supply: risks & opportunities

- Increasing labor costs in China
- Cheaper energy in USA (Shell oil & gas)
- Relocalization in the Americas, including NA
- Opportunity: increase productive investment in Mexico
- Risk: times and costs of border crossings outsetting labour costs advantages

Main Road Network & Transport Corridors

Mexican corridors:

México-Nuevo Laredo-Ldo

México-Cd. Juárez-El Paso

México-Nogales-Nogales

Mexican intermodal corridors

Manzanillo-Guadalajara-

Laredo/Cd. Juárez

Lázaro Cárdenas-Nvo. Laredo

Veracruz-México

Other main commercial ports

Tampico-Altamira, Tams.

Progreso, Yucatán

Ensenada, BC

Guaymas, Son.

Mapa elaborado por la CCA con datos de: TTI, *Greening North American Transportation Corridors: Challenges and Opportunities*, Instituto de Transporte de Texas Transportation Institute, TTI) y Texas A&M University, mayo de 2010.
